NEIC ***15*** *03:20:26.0±0.0, 55°.15N×61°.41E, h0^{km}, MN4.2, Special solution.*

NEIC Chelyabinsk, Russia meteor explosion [bolide] which occurred at approximately 03:20:26 UTC or 9:20:26 AM local time. At least 1,000 people were injured and over 4,000 buildings damaged when windows were blown out by the shock waves. Location and times of the explosion are approximate, and the station arrival times are for the ground-coupled surface wave. The magnitude represents only the energy in those surface waves, and therefore greatly underestimates the actual energy released by the atmospheric event. It is estimated that the meteor was 15-17 meters in diameter and weighed between 7,000 and 10,000 tons. The energy released in the explosion is estimated to be equivalent to 300-500 kilotons of TNT. This is believed to be the largest bolide event since the Tunguska, Siberia blast in 1908. For more information on the meteor visit the NASA webpage: http://www.jpl.nasa.gov/news/.
